Emotions/Hormones

Male Issues (discussions specifically with the boys)

- hormonal urges/thoughts

- erections & nocturnal emissions

- health

- hygiene (shaving & showering)

- testicular & prostate cancer (self-exams)

Boys & Girls (taught separately):

Boys & Girls are different both emotionally AND physically but BOTH males' & females' bodies are designed to increase the chance of continuation/prolonging the species. The purpose of the reproductive system is to REPRODUCE. Because of the high chance of conception, **abstinence** is the only 100% sure way to prevent pregnancy.

Male & Female Reproductive Systems- Anatomy, Physiology, Hormones

Risks of Deciding to Have Sex

- Pregnancy (human life is at stake)

- Sexually Transmitted Diseases (STDs & HIV)

- Emotional issues

How to Avoid Sexual Pressures (How to say no)

Sexual Assault & Abuse (How to identify it and what to do)
